More precisely, a data structure is a collection of data values, the relationships among them, and the functions or operations that can be applied to the data.Data structure - Wikipedia Clipboard. While the results of a query can be read directly into a DataFrame, I prefer to read the results directly from the clipboard. I'm often tweaking queries in my SQL client (), so I would rather see the results before I read it into pandas.Once I'm confident I have the data I want, then I'll read it into a DataFrame.Intro to pandas data structures - Greg Reda Data Structures.
